WORK EXPERIENCE

Intern at June, 2022- August, 2023
Dotcom Solutions

- Developed and implemented various software systems, including CRM, inventory management, auction, and work management systems for diverse clients.
- Significantly contributed to a smart water meter project, focusing on the super admin, admin, and consumer panels.
- Implemented a feature to calculate water charges per liter and integrated smart meter readings, reducing tenants' water consumption and expenses.
- Designed and developed a web interface for real-time water consumption tracking and data export functionality to Excel.
- Created a mobile application for the smart water meter, enhancing user and admin experience with additional functionalities.
- Developed multiple mobile applications for both Android and iOS platforms.

Freelance Software Developer / Co-Founder of TM Solutions & SynapsisUI August, 2023 - Present

- Co-founded a digital agency, managing client relationships and delivering custom software solutions.
- Built a UI library for React Native which offers lightweight and highly customizable animated components which can be easily integrated into any react native mobile app.
